

The Passover Skeptic

Please refer to the additional pictures of the game floor Board used for this activity.

The students began at Start:

The students were presented with 2 questions: 1 easy and 1 hard.

Once they chose their path and answered the question they could proceed.

The easy route was laterally driven and the hard route allowed the students to proceed to the next step level.

The students then answered another question of their determination – easy or hard and they then progressed laterally or stepped higher.

This continued until the students reached the end of the floor game board.

The questions presented were all related to Passover:

Facts from the Torah, facts from the Haggadah, Blessings and just general facts surrounding the seder.
